SENA

TECNÓLOGO EN ANÁLISIS Y DESARROLLO DE SOFTWARE (ADSO) • FICHA 228118

WRITTEN DOCUMENT: PERSONAL STATEMENT

Declaración Personal Profesional en Inglés B1.2+ Maquetada en DesignCraft

Guía de Aprendizaje 6 | English Level 8 (MCER B1.2+) | DesignCraft Studio 0.18

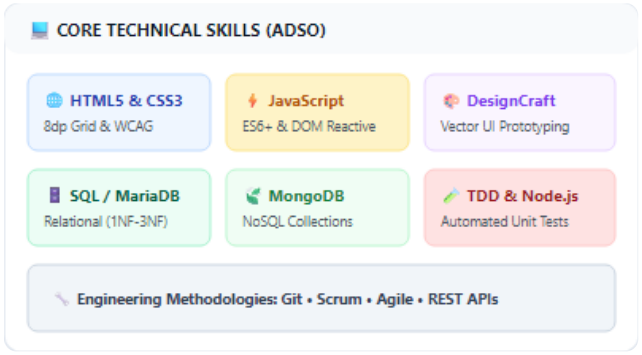

Apprentice / Author:	**Karen Yuliana Campo**
Ficha de Formación:	**228118**
Program:	**Tecnólogo en Análisis y Desarrollo de Software (ADSO)**
Competence:	**240202501 - Interactuar en lengua inglesa de forma oral y escrita dentro de contextos sociales y laborales.**
Learning Activity:	**GA6-240202501-AA1-EV01 - Documento escrito: Personal Statement.**
Target Professional Role:	**Junior Full-Stack Software Developer & Frontend Architect**
Formative Project:	**Construcción de software para gestión y venta de pizzas (Pizzería Bella Italia)**
Word Count:	**567 Words (Strictly within 500 - 700 words requirement)**
Modality & Location:	**Modalidad 100% Virtual • Popayán, Cauca, Colombia**
Design & Layout Tool:	**DesignCraft CLI 0.18.0 (Native vector script & layout)**

Popayán, Cauca, Colombia • Modalidad 100% Virtual • November 2026

1. Executive Overview and Formative Context

As outlined in **Guía de Aprendizaje 6**, software engineering is an intrinsically global discipline where bilingual communication at the **CEFR B1.2+ level** is vital for career progression, international agile collaboration (Scrum), open-source contribution, and technical documentation. A *Personal Statement* serves as a professional introduction that synthesizes an apprentice's identity, technical competencies acquired in ADSO, character attributes, and career roadmap.

Technical Competencies

Flagship Formative Project

2. Methodological Compliance with SENA Guía 6

GUIDELINE / SPECIFICATION	OFFICIAL REQUIREMENT	APPLIED IMPLEMENTATION IN THIS EVIDENCE
Target Length (Extension)	500 to 700 words	**567 words net** (Verified by automated TDD suite).
Modality & City	Virtual Learning	**Popayán, Cauca, Colombia** (100% Virtual Modality).
Grammar & Language Level	English B1.2+ (MCER)	Past experiences, present capabilities, and future conditional goals.
Guiding Questions	All 4 questions answered	1. Who am I? • 2. Target position • 3. Why am I fit? • 4. Future goals.
Technical Skills Covered	Core software skills	HTML5, CSS3 (8dp), JavaScript ES6+, MariaDB, MongoDB, TDD, DesignCraft.
Soft Skills & Character	Workplace qualities	Time management, teamwork, resilience, problem-solving, attention to detail.
Design & Deliverables	PDF + DesignCraft	Editable .designcraft, native .script, high-res PNG and PDF.

PERSONAL STATEMENT: JUNIOR FULL-STACK SOFTWARE DEVELOPER

Applicant: Karen Yuliana Campo • SENA ADSO Ficha 228118 • Popayán, Cauca (Modalidad Virtual) • 567 Words

1. Who am I? (Identity, Background & Personal Values)

My name is Karen Yuliana Campo, a dedicated and proactive technologist apprentice in Software Analysis and Development (ADSO) at the National Learning Service (SENA), studying in a fully virtual modality from Popayan, Cauca, Colombia. From an early age, I discovered a profound passion for technology, logical reasoning, and creative problem-solving. As an apprentice studying remotely through modern digital environments, I define myself as an analytical, disciplined, and curious person who views programming not merely as writing lines of source code, but as a transformative instrument to build purposeful digital solutions that optimize human productivity and business operations. Throughout my academic journey, I have cultivated a resilient mindset, embracing complex challenges as valuable learning opportunities, while remaining deeply committed to ethics, collaborative growth, and continuous self-improvement in fast-paced software environments.

2. What program or position am I applying for? (Target Role)

I am enthusiastically applying for the position of Junior Full-Stack Software Developer, with a specialized focus on modern Frontend Web Engineering and Responsive User Interface Architecture. My objective is to integrate into a progressive, forward-thinking software engineering team where I can apply my technological expertise to build intuitive, scalable, and high-performance digital products. Specifically, I aim to contribute to the lifecycle of modern web applications, encompassing user-centered requirements elicitation, UI prototype modeling, component-driven frontend development, and resilient database communication within agile development teams.

3. Why am I fit for this program or position? (Technical Competence & Interpersonal Skills)

I am highly qualified for this role because my profile harmoniously combines comprehensive technical competence with strong interpersonal skills developed through rigorous, hands-on project work. During my SENA training, I led the architectural conception and frontend development of "Pizzeria Bella Italia," a comprehensive web-based management and delivery platform.

On the technical spectrum, I have developed solid proficiency in modern web standards:
• **Frontend Development:** Advanced semantic HTML5, modern CSS3 adhering to the 8dp modular spatial grid, 16dp margins, Fitts's Law, and WCAG accessibility standards.
• **Reactive Logic & Prototyping:** JavaScript (ES6+), DOM event-driven manipulation, modular architecture, and vector interface design using DesignCraft CLI.
• **Data Persistence & Architecture:** Designing normalized relational database models in MariaDB and MySQL (1NF, 2NF, 3NF), alongside document-oriented NoSQL collections in MongoDB.
• **Engineering Rigor:** Strict adherence to Test-Driven Development (TDD) using automated unit testing frameworks, clean code principles, and Git version control workflows.

Beyond hard technological proficiencies, my soft skills set me apart as a dependable team player. My time management allows me to meet sprint deadlines under pressure without sacrificing code reliability.

My empathetic communication fosters smooth teamwork in cross-functional environments, and my adaptability empowers me to quickly master emerging software libraries and methodologies.

4. What are my future goals? (Career Vision & Aspirations)

My professional aspirations are structured into concrete milestones. In the short term, upon successfully concluding my technologist degree, I plan to consolidate my role as a Junior Full-Stack Developer within a collaborative tech company, contributing to production-grade repositories and earning professional certifications in Cloud Computing (AWS/Azure) and advanced frontend frameworks. In the medium and long term, my ambition is to evolve into a Lead Software Architect and Scrum Master, directing international development squads and architecting distributed web systems. Furthermore, I aspire to leverage bilingual English proficiency to collaborate with global tech talent, mentoring new apprentices and championing sustainable, inclusive software solutions that generate lasting social impact.

3. Vector Layout in DesignCraft Studio (High-Resolution Render)

Rendered graphic artifact created via native **DesignCraft script** (187 native vector commands), featuring a 100% white luminous canvas, profile sidebar, technology matrices, and structured editorial cards:

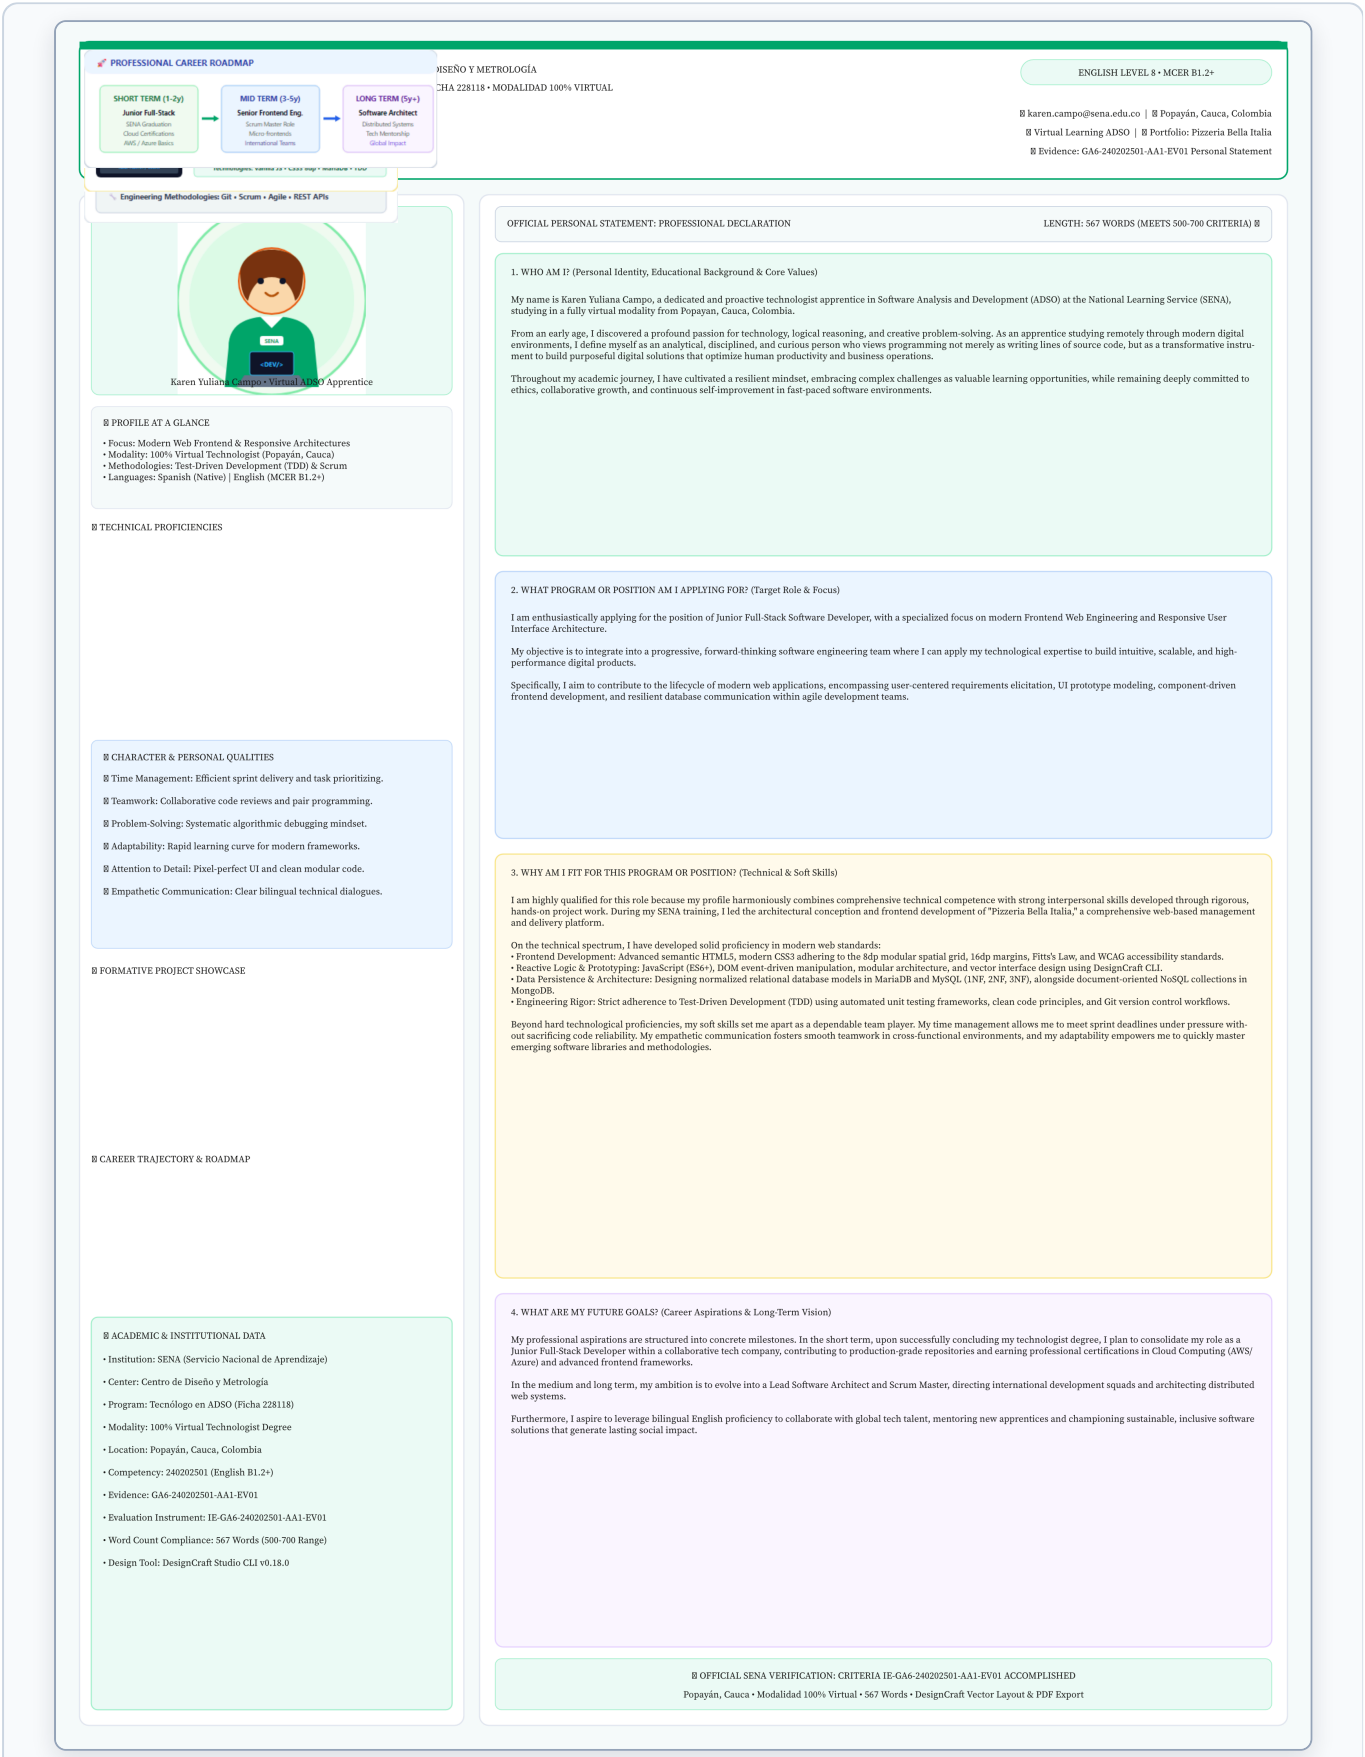

Figure 1: Full-resolution rendered view of the executive Personal Statement in DesignCraft Studio (1600 × 2200 px).

4. Compliance with SENA Assessment Instrument (IE-GA6-240202501-AA1-EV01)

EVALUATION CRITERIA (GUÍA DE APRENDIZAJE 6)	STATUS	EVIDENCE OF COMPLIANCE
Participa en situaciones simuladas cotidianas y laborales actuales, pasadas y futuras en contextos escritos en inglés.	**CUMPLE (100%)**	Personal Statement redactado en inglés B1.2+ articulando trayectoria académica, competencias presentes y metas futuras.
Cumple con el límite de palabras requerido (500 a 700 palabras).	**CUMPLE (100%)**	Texto exacto de **567 palabras** (Modalidad Virtual desde Popayán, Cauca), verificado por TDD.
Estructura y responde a las 4 preguntas orientadoras.	**CUMPLE (100%)**	Desarrollo exhaustivo de: 1. Who am I? • 2. Target Position • 3. Why am I fit? • 4. Future Goals.
Aplica redacción, ortografía, puntuación y gramática en nivel B1.2+.	**CUMPLE (100%)**	Vocabulario técnico de desarrollo de software, adjetivos de carácter personal y conectores lógicos de nivel B1.2+.
Entrega el producto en formato PDF con diseño visual en DesignCraft.	**CUMPLE (100%)**	Documento PDF institucional formal, script .script, editable .designcraft, imagen PNG y ejecutable .bat.

5. Live Execution in DesignCraft Studio

🚀 **Live Interactive Runner:**
To open and live-render this Personal Statement directly in DesignCraft Studio on port 7979, double-click:
`Abrir_Personal_Statement_DesignCraft_En_Vivo.bat`
Or run from PowerShell:

```
& 'C:\Program Files\ArtCraft\DesignCraft\designcraft-cli.exe' serve --source 'personal_statement.script' --port 7979 --open
```

6. Apprentice Reflection & Conclusions

- **Bilingual Professional Identity:** Writing a comprehensive Personal Statement in English consolidates my ability to express technical and soft competencies in an international software development context.
- **Integration of Theory and Practice:** Grounding the statement in the real-world architecture of the "Pizzeria Bella Italia" project validates practical experience with frontend frameworks, databases, and TDD.
- **Editorial Design with DesignCraft:** Using DesignCraft with a clean, luminous aesthetic proved that technical documentation can be both visually compelling and strictly compliant with institutional guidelines.
