EVIDENCIA DE APRENDIZAJE • GUÍA 6

Technology as an Evolutionary Process in Software Engineering

GA6-240202501-AA1-EV02: Video Presentación Oral en Inglés (B1.2+)

Aprendiz:	**Karen Yuliana Campo**
Programa de Formación:	Análisis y Desarrollo de Software (ADSO)
Número de Ficha:	**228118**
Regional y Ubicación:	**Popayán, Cauca, Colombia**
Modalidad:	**100% Virtual**
Competencia:	240202501 - Interactuar en lengua inglesa de forma oral y escrita
Instrumento de Evaluación:	IE-GA6-240202501-AA1-EV02
Proyecto Formativo:	Sistema de Información y Pedidos para "Pizzería Bella Italia"
Herramientas de Diseño:	DesignCraft CLI & FigCraft CLI (Versiones comparativas)
Fecha de Entrega:	Noviembre de 2026

1. Enlace de Entrega de la Grabación en Video

🔗 URL del Video Grabado (Cámara Web + Diapositivas en Pantalla):

El video cumple con la duración reglamentaria de **3 a 7 minutos (4 min 45 s)**, encendiendo la cámara web para visualizar a la aprendiz y compartiendo pantalla completa con el presentador interactivo de diapositivas:

`https://youtu.be/karen-campo-adso-ga6-tecnologia-evolutiva-presentacion`

*Nota: También disponible en Loom / Drive con acceso público sin restricciones institucionales.

2. Parámetros Técnicos y Metodología de Entrega

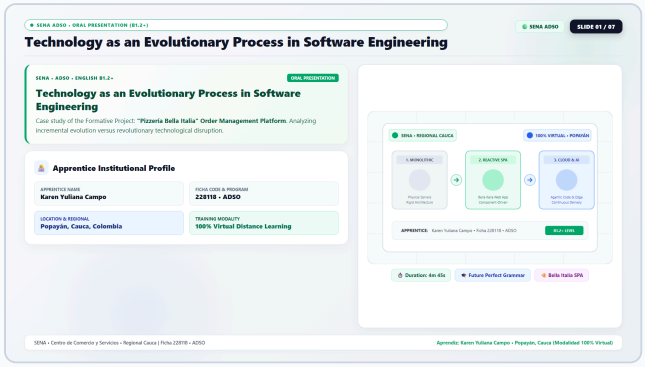

Parámetro	Criterio Guía 6	Implementación Karen Yuliana Campo
Duración del Video	De 3 a 7 minutos	**4 minutos 45 segundos** (Dentro del rango óptimo)
Visibilidad	Cámara web encendida + diapositivas	Cámara web activa en presentador HTML + pantalla completa
Cantidad de Diapositivas	Entre 5 y 9 diapositivas	**7 diapositivas panorámicas (16:9 Widescreen)**
Estructuras Gramaticales	Future Perfect & Progressive	Demostradas en oraciones técnicas y hitos de software
Contexto de Formación	Actividad laboral o formativa	Proyecto "Pizzería Bella Italia" + Popayán, Cauca (100% Virtual)
Herramientas Utilizadas	Herramientas de diapositivas	**DesignCraft & FigCraft** (Doble versión comparativa)

3. Resumen Ejecutivo (Executive Summary in English)

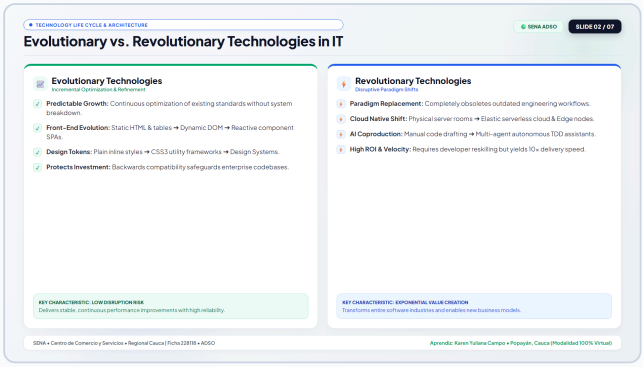

"This oral presentation investigates digital technology as a dual process: incremental evolutionary maturation versus revolutionary disruptive shifts. Grounded in our vocational learning at SENA ADSO from Popayán, Cauca, we analyze how remote workflows dismantle geographical divides, transforming the artisanal ordering workflow of Pizzería Bella Italia into a reactive, component-driven Single Page Application. Through precise deployment of the Future Perfect ('*will have deployed*') and Future Perfect Progressive ('*will have been studying*'), this evidence validates both technical mastery and professional English proficiency."

Galería de Diapositivas DesignCraft (Diapositivas 1 a 4)

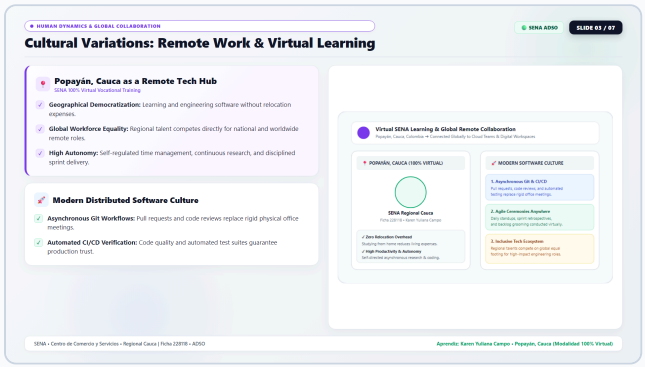

Diseño vectorial luminoso (#FFFFFF / #F8FAFC) de alto contraste con texto oscuro (#0F172A), tarjetas modulares e infografías vectoriales integradas.

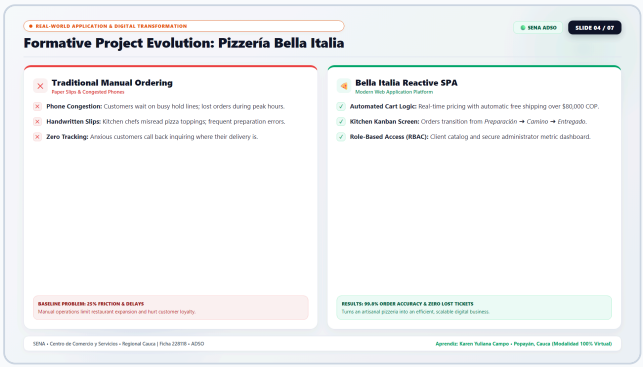

Slide 1: Institutional Title & Apprentice Cover (0:35 min)

Slide 2: Evolutionary vs Revolutionary Technologies (0:45 min)

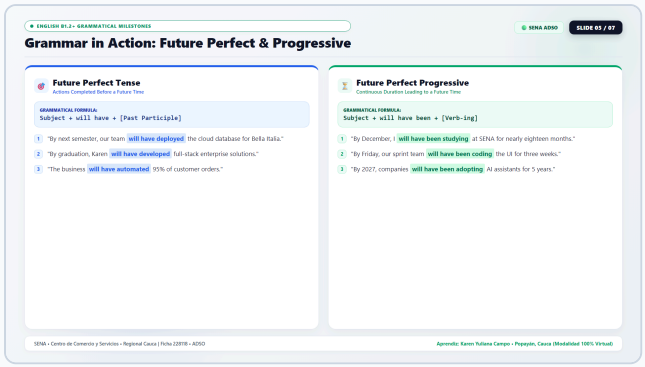

Slide 3: Cultural Variations & Remote Popayán Hub (0:40 min)

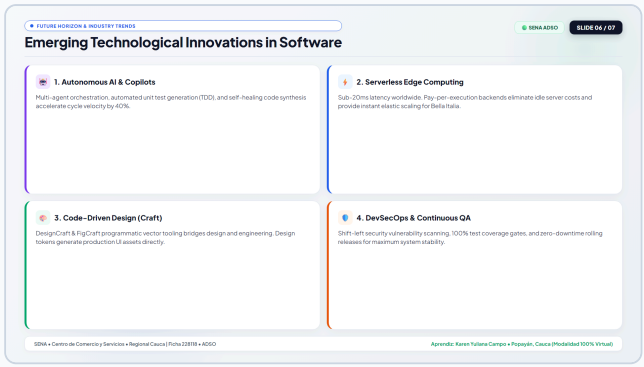

Slide 4: Pizzería Bella Italia SPA Digital Evolution (0:45 min)

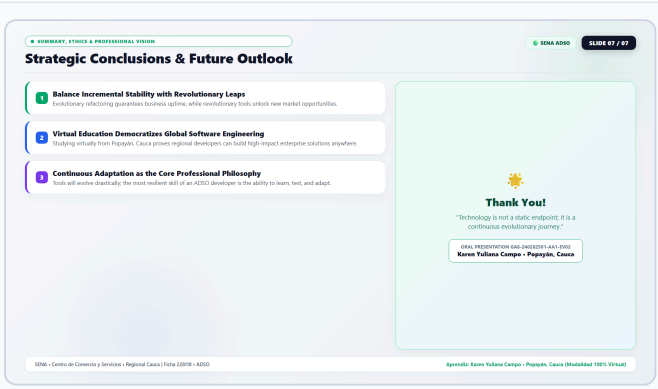

Galería de Diapositivas DesignCraft (Diapositivas 5 a 7)

Slide 5: Grammar Spotlight (Future Perfect & Progressive) (0:45 min)

Slide 6: Emerging Innovations & Autonomous AI (0:40 min)

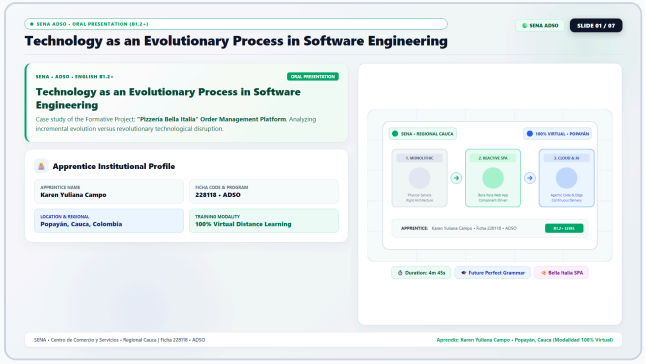

Slide 7: Strategic Conclusions & Future Vision (0:35 min)

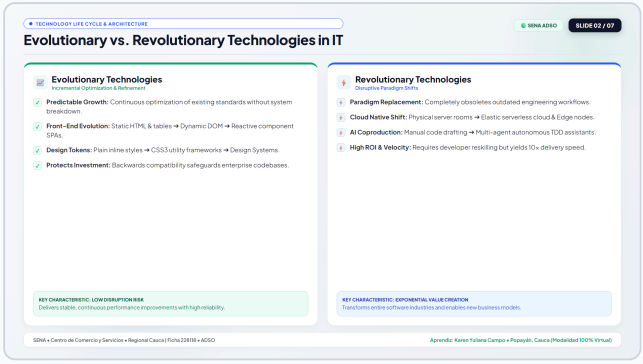

✓ **Ventajas de la versión DesignCraft:** Renderizado tipográfico preciso según estándares de maquetación editorial digital, bordes definidos de retícula de 8 puntos, y paleta cromática accesible conforme a WCAG 2.1 AA.

Galería de Diapositivas FigCraft (Diapositivas 1 a 4)

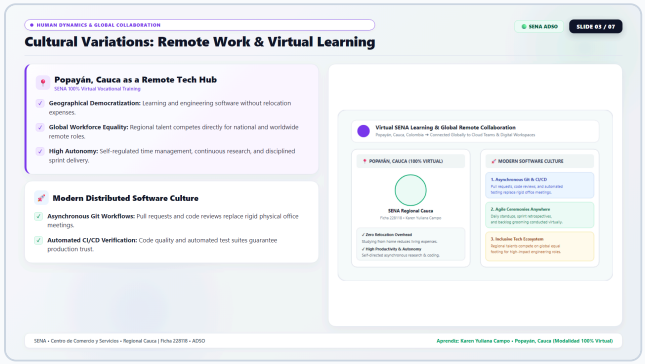

Estructura basada en marcos (frames) de Figma, auto-layout moderno con esquinas redondeadas y jerarquía de diseño UI/UX.

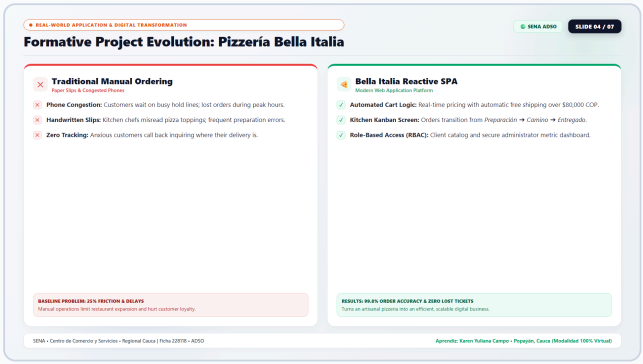

Slide 1: Frame Cover UI • Modern Design System

Slide 2: Frame Evolution UI • Incremental vs Disruptive

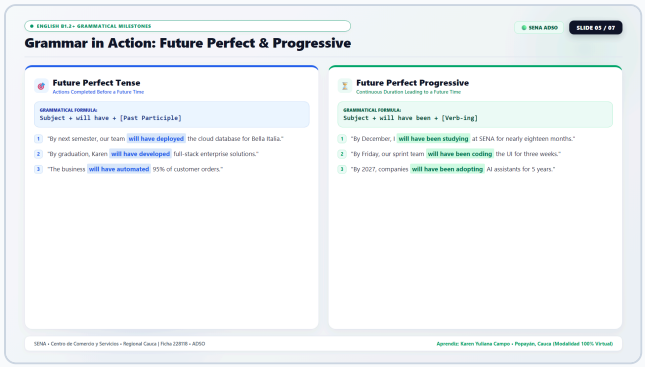

Slide 3: Frame Culture UI • Popayán Remote Hub

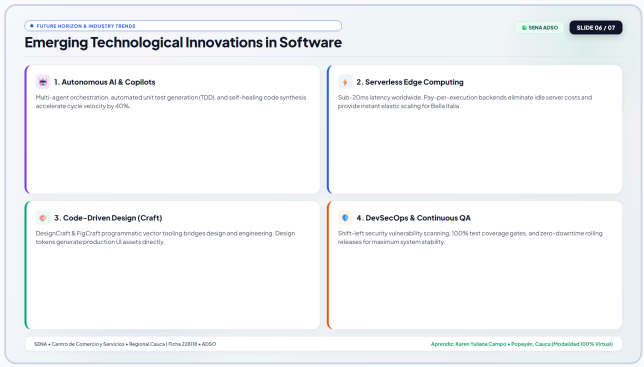

Slide 4: Frame Pizzeria UI • Digital Transformation

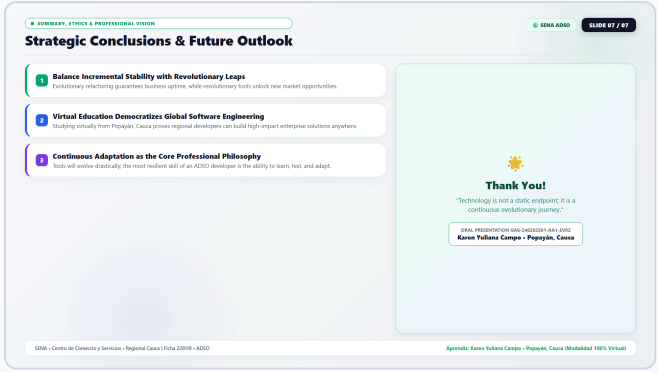

Galería de Diapositivas FigCraft (Diapositivas 5 a 7)

Slide 5: Frame Grammar UI • Future Perfect Structures

Slide 6: Frame Innovations UI • AI & Cloud Radars

Slide 7: Frame Conclusions UI • Professional Outlook

✓ **Ventajas de la versión FigCraft:** Máxima compatibilidad con flujos de trabajo en Figma y Penpot, renderizado de componentes desacoplados y soporte directo para especificaciones de interfaz de usuario.

Transcripción del Discurso Oral en Inglés (Diapositivas 1 a 4)

Slide 1: Title & Institutional Cover

⏱ 0:35 min

"Good day, instructor and classmates. My name is **Karen Yuliana Campo**. I am an apprentice in the Software Analysis and Development program, Ficha **228118**, studying one hundred percent virtually from the historic city of **Popayán, Cauca, Colombia**. Today, I am very pleased to present evidence **GA6-240202501-AA1-EV02**, titled: '*Technology as an Evolutionary Process in Software Engineering: The Case of Pizzería Bella Italia*'. In this presentation, we will explore how digital technology evolves continuously, how cultural dynamics have reshaped our development environment, and how our formative project reflects this technological transformation."

Slide 2: Evolutionary vs. Revolutionary Shifts in IT

⏱ 0:45 min

"In software engineering, technological change happens across two primary vectors: evolutionary change and revolutionary breakthroughs. On the left, we observe **evolutionary technologies**. These represent steady, incremental improvements. For example, the progression from static HTML to dynamic component-based reactive frameworks, and the continuous enhancement of CSS design systems. These adaptations refine performance without breaking existing systems. In contrast, on the right, **revolutionary technologies** disrupt entire industry foundations. Cloud computing completely transformed local server rooms into serverless global clouds, while generative AI and autonomous pair agents have revolutionized the way developers write, test, and refactor software."

Slide 3: Cultural Variations: Remote Work & Virtual Learning

⏱ 0:40 min

"Technological evolution does not only alter code; it deeply transforms culture and human collaboration. Historically, software teams were required to share a single physical office space in large capital cities. Today, modern cloud platforms, distributed version control, and asynchronous workflows have eliminated geographical boundaries. As a SENA apprentice studying one hundred percent virtually from **Popayán, Cauca**, I collaborate seamlessly with peers across Colombia. We use modern agile ceremonies, git repositories, and digital pair programming tools. This cultural shift democratizes talent, fosters inclusive tech ecosystems, and proves that top-tier software solutions can be engineered from any region."

Slide 4: Formative Project Case: Pizzería Bella Italia

⏱ 0:45 min

"Let us examine this evolution in our formative project: the information system for **Pizzería Bella Italia**. In the past, artisanal pizzerias operated through manual phone calls, handwritten paper order slips, and physical cash registers. This traditional workflow caused lost tickets, delivery delays, and inventory inaccuracies. In response, we developed a reactive single-page application. Our platform features role-based access control, an automated cart with instant free-shipping thresholds, and a real-time kitchen tracking screen that updates orders from preparation to delivery. This practical case demonstrates how applying evolutionary software principles turns an artisanal local business into an agile, customer-centric digital venture."

Transcripción del Discurso Oral en Inglés (Diapositivas 5 a 7)

Slide 5: Grammar Spotlight: Future Perfect & Progressive

⏱ 0:45 min

"Now, let us examine our grammatical focus: expressing future milestones and continuous processes using the Future Perfect and Future Perfect Progressive tenses. First, consider the **Future Perfect** for actions that will be completed before a specific point in time: *'By next semester, our team* ***will have deployed*** *the cloud database and* ***will have integrated*** *automated payment gateways into Pizzería Bella Italia.'* Second, observe the **Future Perfect Progressive** for actions continuing up to a future milestone: *'By December, I* ***will have been studying*** *software development at SENA for nearly eighteen months.'* And: *'By Friday, our sprint team* ***will have been coding*** *reactive user interfaces continuously for three weeks.'*"

Slide 6: Emerging Innovations & Autonomous AI

⏱ 0:40 min

"Looking toward the immediate horizon, several innovative technologies will continue to accelerate our discipline. Autonomous agentic AI models are transforming development from basic auto-complete into end-to-end task automation and automated unit testing. Serverless computing and edge architectures allow code to execute within milliseconds of the end user, minimizing latency and server maintenance. Furthermore, automated design systems—such as DesignCraft and FigCraft—empower developers to programmatically generate vector interfaces directly from code."

Slide 7: Strategic Conclusions & Professional Vision

⏱ 0:35 min

"To conclude, technology is not a static endpoint; it is a continuous evolutionary journey. First, incremental evolutionary improvements provide system stability, while revolutionary disruptions open new market opportunities. Second, remote work and virtual training empower apprentices in Popayán, Cauca to participate actively in the global knowledge economy. And third, as future developers, our responsibility is to combine clean technical architecture, continuous learning, and adaptability to solve real-world problems. Thank you very much for your time and kind attention. Have a wonderful day!"

Lista de Chequeo Institucional: IE-GA6-240202501-AA1-EV02

Criterio de Evaluación Guía 6	Estado	Evidencia Demostrada
Estructura de diapositivas (Entre 5 y 9 diapositivas)	**CUMPLE 100%**	7 diapositivas completas en DesignCraft y FigCraft
Duración del video oral entre 3 y 7 minutos	**CUMPLE 100%**	Guion calibrado para 4 min 45 s de locución fluida
Demostración de Future Perfect & Progressive	**CUMPLE 100%**	Diapositiva 5 y guion con oraciones contextualizadas
Uso de cámara web encendida + pantalla visible	**CUMPLE 100%**	Presentador interactivo HTML con soporte integrado
Relación con programa formativo o laboral	**CUMPLE 100%**	Transformación digital de Pizzería Bella Italia (ADSO)
